Lucky-PIP® Pre-insulated Pipe

A New Generation of Thermal Insulation System

Environmentally Friendly
Energy Saving
Cost and Time Saving
Prefabrication
Robust and Durable
Enhance Site Management

A Lucky-PIP Pre-insulated Pipe System is an Ozone friendly system with the option of CFC, HCF and HCFC free system. It is suitable for both high and low temperature applications with a broad range of service temperature of -50°C to 140°C.

Lucky-PIP comes with rigid metal jacket providing a robust mechanical protection to the thermal insulation. The rigid metal jacket also acts as a vapour barrier to avoid vapour molecule ingress to the thermal insulation resulting in a more efficient and durable thermal insulation system.

Since Lucky-PIP is produced by foaming / moulding method in the factory, it can easily insulate pipes and fittings of any size and shape to largely reduce waste by 25 percent. Every part and component of the pipework system can be insulated by Lucky-PIP both on-site and off-site. Furthermore, Lucky-PIP is produced in a well set up factory, it is perfect for Prefabrication projects which minimises labour cost, workmanship error and site management cost.

Using High-Technology machineries for production, Lucky-PIP allows customers to enjoy its high-quality finish with robust and durable features, thus greatly reduces future maintenance and energy cost in the long-run.

Having passed 120 mins integrity, Lucky-PIP (with metal jacket) can penetrate wall or floor opening directly without fire ring between the pipe and the wall, eliminating the potential thermal bridge. Due to the high compressive strength of Lucky-PIP, no high-density load bearing or hard wood block are required at the pipe supports, eliminating another potential thermal bridge and simplifying the installation process.

Recommended Minimum Insulation Thickness for Chilled Water Pipe BEC Standard (Using BS 5422 : 1990 method)

		Thermal Conductivity, $\lambda = 0.0236 \text{ W/m K}$					
Nominal Size of Pipe (mm)	Outer Diameter of Pipe (mm)	(St	Condition ill air)	Outdoor Condition (wind speed = 1 m/s) 35 °C, 95% R.H.			
		/ / 28.8 ℃	, 80% R.H.				
		Calculated Thickness (h = 5.7)	Recommended Thickness*	Calculated Thickness (h = 9)	Recommended Thickness*

^{*} Chilled Water Temperature In/Out: 5 °C/12 °C

Advantages of using Lucky-PIP

- · Environmentally Friendly CFC/HCFC/HCF Free
- · Robust and Durable Minimize Maintenance Costs
- · Eliminates potential Thermal Bridges (at Pipe Support and Wall Penetration)
- · Less Workmanship at Site Less Human Error, Improve Safety and Site Management
- · Perfect for Prefabrication
- · Can Insulate any Pipework Route and any Shape and any Fittings
- · Production Schedule Regardless of Site Condition Improves Time Management
- · High Insulation Efficiency Energy Saving
- · Less Commercial Wastage
- · Single Action for Complete Installation
- · Ultimate Vapour Barrier and Weather Resistance

General Specification

1.General

Manufacturer: Link The Best Company Limited

Brand Name: Lucky-PIP®

Country of Origin: The Hong Kong Special Administrative Region

Jacket material shall be as specified and shall be sufficiently sized to allow for desired insulation thickness for optimum performance of the system.

Standard Jacket

- Galvanized Steel 0.5 / 0.6mm thick
- Aluminium 0.8 mm thick
- Stainless Steel 0.5 / 0.6mm thick
- High Density Polyethylene (HDPE)

3. Thermal Insulation - Rigid Polyurethane Foam

Density: 48kg/m³ to 60 kg/m³ (Base on customer requirement)

Thermal Conductivity: 0.0236 w/m°C at 20°C mean temperature

Service Temperature: -50°C to+140°C

Compressive strength: 275 Kpa (Insulation only)

Water permeability: 1.4 perm. In (Insulation only) (Equivalent to 0.002 g · m / s · MN)

Fire rating (complete system): BS476 Part 6 I <12; i <6 BS476 Part 7 Class 1

Fire Test for 120 minutes integrity

Closed Cell Content: ≥ 95%

Ozone Friendly: CFC / HCFC / HCF Free

4. Service Pipe

Pipe shall be as specified for desired service, e.g. Black Steel Pipe, Galvanized Iron Steel Pipe, Copper Pipe, PVC Pipe and etc...

5. Fittings

Prefabricated and preinsulated elbows, loops and tees shall be furnished and installed where shown on plans and shall consist of pipe, insulation and jacket conforming to the same specifications as specified for straight runs.

6. System Support and Anchor

All pipe supports shall be on the outside of the cladding, no high-density load bearing or hard wood block at the pipe support are required.

7.Installation

All pipes and accessories shall be installed in accordance with the manufacturer's recommendations. The services of a factory-trained field service instructor shall be required during all critical stages of installation and testing.

^{*}Other jacket material upon request
